WHAT IS ARBITRAGE SYSTEM

Price latency arbitrage forex is a trading system based on the delay or hanging of data feed. For successful work with this strategy you need a fast data feed provider and a slow broker, where the quotes delayed (lag).

Delay quotes arises from errors in the software of the broker or problems on its server. Also, a broker can use a bridge for connecting it with a provider of liquidity. Due to this, quotes can also have delay or lag. Particularly strongly the difference in data feed is noticeable in the large volatility of the market, at the time of important news, the publication of analysts of rating agencies, changes in economic data and so on.

Lagging of data feed occurs on most brokers using trading terminals Meta Trader 4, Meta Trader 5, cTrader. These terminals are not ideal, due to which we connect the fast quotes to the Expert Advisor Newest PRO directly from the exchange (via the Trade Monitor 3.7 program), we get the advantage, which allows us to learn the data feed 100-300 milliseconds before it appears in the broker's terminal.

Software Trade Monitor 3.7 is connected to the fastest current data feed providers Rithmic, CQG, Interactive Brokers, Lmax Exchange, Saxo Bank, IQ Feed, CTS T4, Gain Futures OEC. To work with each of them you will need to open a demo or a real account.

The Newest PRO EA gets fast data feed from the Trade Monitor 3.7 program every millisecond and compares them with quotations in the broker's terminal. When there is a backlog of data feed, the trading algorithm of the expert adviser starts to work, allowing receiving the maximum profit from each signal.

The new version of the expert adviser Newest PRO deserves special attention. Now the client has a choice of which data feed provider to use. Added new liquidity providers Interactive Brokers and Ninja Trader. We also developed a unique Multi Connectors technology, through which you can get fast quotes from any terminal Meta Trader 4, MetaTrader 5, cTrader or Ninja Trader.

CLIENT LOGIN

For use of Trade Monitor 3.7 Exclusive software you need to activate license and you have to get register your VPS or PC. For this you need:

1. Install **vc_redist.x64** and **vc_redist.x86** (Microsoft visual c++ redistributable package for visual studio 2015) and NDP452-KB2901954-Web (**Net Framework 4.0 or above**) from the folder named (Setup files)
2. Then open folder named (Trade Monitor 3.7 Exclusive) then install Trade Monitor software. After Installation run TradeMonitor.exe from the Icon appear on Desktop.

Next you will see software login form

3. Come up your username and fill in the "Client Name" (You have to use only your email address) For example:

westernpips@gmail.com1 for VPS 1
westernpips@gmail.com2 for VPS 2
westernpips@gmail.com3 for VPS 3

4. After Entering of username click the button below "Send Application" If all goes well, you will see a message:

5. Once our Customer Support Admin will check your request, you will be able to sign in with your login (from 5 minutes to 1 day).
6. You Can Also Contact Our Customer Support Admin through Skype or Email about your license request activation.

Skype: group.westernpips

Email: westernpips.group@gmail.com

7. If you see another message, please try again. If you have still problems, please contact us.

8. If you already received mail about your login activation (admin say "Your login active now), you can use Trade Monitor software.
9. Click "Login to Trade Monitor" button.

How to change a user name if you forgot it, or replaced VPS: It is necessary to send an email to westernpips.group@gmail.com with a request to deactivate an old user name. After that, Admin will delete old username and Admin will send you an email that your old username is removed. Now send a new license request for registration and then inform to Admin about New Request or wait for the answer of the Admin (from 5 minutes to 1 day).

If you need additional VPS license is the overall cost is paid. Check your tariff plan for learn more about the number of license that you can use in same time.

TRADE MONITOR MAIN WINDOW

If your license is okay, you will see the main window of the Trade Monitor program.

Here you will see a button bar on the left: "**Saxo**" -

Start data feed from Saxo Trader. **"Lmax"** - Start

data feed from Lmax Exchange API/FIX4.4

"Rithmic" - Start data feed from Rithmic API.

"CQG" - Start data feed from CQG API.

"Multi Connectors" – Click this button if you need select other providers (IQ Feed API, Interactive Brokers TWS API and e.t.c)

"?" - Open the user guide.

Also here you will see the current version of the program and your user name.

PING IP

On Ping tab, you can check your ping with any site and IP address. Enter the IP address and click the button "Ping IP".

You will see how many milliseconds is your ping. Then smaller to smaller value, the better.

The Best Ping this 0 milliseconds!!!

We recommend to use cross connected dedicated servers for the best results in arbitrage trading and for fastest ping to your broker and data feed providers.

HOW TO USE WESTERNPIPS FEEDER

NEW!!! Now all our customers can use our own data feed with real accounts of LMAX and RITHMIC. We provide the data feed at frequency 2 milliseconds.

You can find "Use Server Feed" option in Trade Monitor 3.7 Exclusive program. Only click here and start LMAX or RITHMIC data feed monitor monitor. No need enters login and password.

HOW TO CHOOSE INSTRUMENTS FROM LIST

NEW!!! The new version has the ability to customize and choose the instruments for the trade that you need. If you do not want to use any of them instruments, simply remove it with a tick. You can also send a request to add any new instruments in our program. Use the form to send the request. After you send your request to our Administrator then it will be added within 3 days

DESCRIPTION AND SETTINGS OF ADVISOR NEWEST PRO 3.7 EXCLUSIVE

GENERAL SETTINGS

Here you will find a description of the general settings for all advisers. In the "Note" given the nuances of using those or other settings. Please read carefully and understand working of settings before trading.

EA settings	The default value	Description	Note
WesternpipsSet1 = "<<< FAST DATA FEED OPTIONS >>>"			
WesternpipsSet1_1="0-Saxo; 1-Lmax; 2-CQG; 3-Rithmic;"			
ModeOfQuotes	Select from list	Saxo Bank Lmax Exchange CQG Rithmic Meta Trader 4 Connector Meta Trader 5 Connector cTrader Connector Ninja Trader Connector Interactive Brokers IQ Feed Westernpips FIX Trader 3.9 Feed CTS T4 Feed OEC Feed	You can connect only to the one data feed agent from 1 chart. To connect all data feed, need to open an additional charts on the same currency pair and for each graph hang Advisor settings for different data feed. This is done to conserve resources and speed the processing of quotes and trading algorithm.
UseSymbCode	false	If the name of the instrument in Meta Trader 4/5 is not different from the name of the tool of the fast data feed provider, use UseSymbCode = false;	If the symbol in MetaTrader 4 has a prefix or suffix, need use UseSymbCode = true. For example, your broker has a symbol EURUSDfx: "fx" is not needed. Just "EURUSD".
SymbCode	"EURUSD"	Here you must specify the name of the symbol of the program from Trade Monitor, for example: "EURUSD" for Lmax Exchange and Saxo Bank, "6EH5" for Rithmic, "X.US.DREURUSD" for CQG FX.	
SymbReturn	false	This option need use only for Rithmic data feed. Some instruments here have reverse quotes.	For example, CADUSD. For reverse to USDCAD use SymbReturn=true;

NEW ALGORITHM!!! AvtoShiftBid	true	Automatic calculation of the shift (alignment) in prices between fast data feed provider and slow MetaTrader 4/5 broker feed.	Better use AvtoShiftBid = true for all time and instruments for get the best arbitrage signals. If you can calculate data feed Shift by manual can use ShiftAsk and ShiftBid settings.
ShiftAsk	0	Shifting Ask prices relative to the Ask price of fast data feed provider	Can use only when AvtoShiftBid = false;
ShiftBid	0	Shifting Bid prices relative to the Bid price of fast data feed provider	Can use only when AvtoShiftBid = false;
FixTraderFeedName	"integral"	Provider Name In Westernpips FIX Trader 3.9	
WesternpipsSet2 = "<<< OPEN ORDERS SETTINGS >>>";			
MinimumLevel	4	Lag (GAP) of quotes between fast data feed provider and MetaTrader 4/5 broker feed in points at which the EA opens an order.	Advisers always counts signal with regard to spread the following formula: Entry signal = MinimumLevel + spread;
NEW!!! MinGapForOpen	0	Minimum Lag (GAP) of quotes in points at which the EA opens an order.	Can use this option if you want control minimum gap for entry signal. For example if you will use MinGapForOpen = 6, EA never open order if gap less than 6 pips.
NEW!!! UseDynamicMinimumLevel	false	Automatic calculation of MinimumLevel.	Can use in brokers with Market Execution of orders.
NEW!!! DynamicMinimumLevelSpreadCoefficient	0.7	Spread factor for the dynamic MinimumLevel. Work within 0.6 - 1.0;	
SignalMode	1	Signal calculation mode.	In Mode 0: Sell signal is calculated by the formula: Fast Bid - Slow Bid; Buy signal is calculated by the formula: Fast Bid - Slow Bid; In Mode 1: Sell signal is calculated by the formula: Fast Ask - Slow Bid; Buy signal is calculated by the formula: Fast Bid - Slow Ask;
NEW ALGORITHM!!! AvtoSettings	true	The settings MinimumLevel, FixTP, FixSL, TakeProfit and StopLoss calculated automatically as spread coefficient (factor).	For example: MinimumLevel = MinimumLevel*spread + spread; FixTP=FixTP*spread; FixSL = FixSL *spread; StopLoss = StopLoss *spread; TakeProfit = TakeProfit *spread;
		This mode is used to trade the average value of the spread on	Better use AvarageSpreadUse =true on Market Execution brokers

NEW ALGORITHM!!! AvarageSpreadUse	true	trading instrument. The average value of the spread is calculated for the all ticks from start trading.	and AvarageSpreadUse =false in Instant Execution (STP) brokers.
NEW!!! TradeByPendingOrders	false	The new feature allows you to use pending orders to trade, which makes it possible to eliminate slippage.	For order Buy will use Buy Stop orders. For order Buy will use Sell Stop orders.
NEW!!! DistanceForPendingOrdersInPips	1	Minimum distance for install pending order in pips	
NEW!!! PendingOrdersLifeTime	1	The lifetime of a pending order. If the time is over an order is deleted automatically.	
NEW!!! OrdersOpenIntervalMs	0	The interval between open new orders in milliseconds.	
NEW!!! MaxAttemptsForOpenOrder	5	The maximum number of attempts to open an order.	If EA can't open order from first attempt (because have requotes or other error) you can use this option. Advisor will try to open the order again and again until no attempt will end.
NTrades	1	The maximum number of open orders for one trading instrument.	
Magic	0	The magic number of the order	
EAComent	Wpips2016	Comments advisor in the order	
ShowCommentsInOrder	true	Show EA Comments in open orders. How to decipher the comments: G - Lag quotes (GAP) in which the advisor was open to the order. Lb - Lmax Bid Price; La - Lmax Ask Price; Sb - Saxo Bid Price; Sa - Saxo Ask Price; Rb - Rithmic Bid Price; Ra - Rithmic Ask Price; Cb - CQG FX Bid Price; Ca - CQG FX Ask Price; Mb - Meta Trader Bid Price; Mb - Meta Trader Ask Price;	The new version adds comments in transactions, that allow knowing, the prices at which there was a signal to the input and compare them. You can calculate the slippage at the entrance to the orders: Compare the prices on which to make a deal with the price indicated in the comments to the transaction (Lb and Ma), If you see a big difference, so this broker strong slippage. It is not appropriate for trading arbitrage.
NEW!!! TradeSideSet 0-Both;1-Buy;2-Sell The choice of priority directions of trade			
NEW!!! TradeSide	0	Directions of trade	If TradeSide = 1, EA will open only Buy orders.

			If TradeSide = 2, EA will open only Sell orders.
WesternpipsSet3 = "<<< CLOSE ORDERS SETTINGS >>>";			
FixTP	1	Floating, invisible to the broker TakeProfit in pips.	If AvtoSettings = true, FixTP calculated automatically as spread coefficient (factor) by this formula: FixTP= FixTP*spread;
FixSL	3	Floating, invisible to the broker StopLoss in pips. Advisers always count FixSL with regard to spread.	If AvtoSettings = true, FixSL calculated automatically as spread coefficient (factor) by this formula: FixSL = FixSL *spread;
NEW!!! RealFixTP	false	Automatic calculation of FixTP. This feature makes it possible to get the highest possible take profit and close the position when the quote gap will be minimal, that is, take all the profit on the signal.	If you use RealFixTP = true, EA will calculate FixTP automatically FixTP is calculated as the difference between the GAP when entering into a order and slippage on the this order.
NEW!!! RealFixSL	false	Automatic calculation of FixSL.	If you use RealFixSL = true, EA will calculate FixSL automatically. FixSL is equal to the current order slippage, if the slippage is zero, it will be used a standard FixSL
UseFixedStopLossAndTakeProfit	true	Enable or disable the hard protective Stop Loss and Take Profit	If you don't want use hard protective StopLoss and Take Profit in orders use UseFixedStopLossAndTakeProfit = true;
StopLoss	10	Hard protective Stop Loss for order	If AvtoSettings = true, StopLoss calculated automatically as spread coefficient (factor) by this formula: StopLoss = StopLoss *spread;
TakeProfit	100	Hard protective Take Profit for order	If AvtoSettings = true, TakeProfit calculated automatically as spread coefficient (factor) by this formula: TakeProfit = TakeProfit *spread;
ShirtStopLoss	false	Use Shirt Stop Loss in open orders.	
ShirtStopLossK	2	Coefficient used to calculate the short StopLoss when the mode ShirtStopLoss =	The formula for calculating StopLoss = Spread * ShirtStopLossK;

		true.	
NEW ALGORITHM!!! CloseWhenPriceEqual	false	If you use CloseWhenPriceEqual = true, The order will be closed only when the slow broker price will catch up with the fast data feed price.	If you use CloseWhenPriceEqual = true, necessarily need use DisableFixTP = true for disable closing order with FixTP.
CloseOrderDelay	0	The minimum duration of the transaction in seconds. If your broker prohibits transactions of less than 1 minute, set this value to 60 seconds. Then the transaction will not close within 60 seconds.	
NEW!!! CloseTimer	0	Forced closure order after a CloseTimer seconds.	If you use CloseTimer = 10, EA will close order after 10 seconds and will not wait to achieve FixTP and FixSL.
NEW!!! DisableFixTP	false	Disable use FixTP.	If you use this option, Expert close order only by TrailingStop, if TrailingStop = true, or if VirtualTrailingStop = true, or by CloseWhenPriceEqual function if CloseWhenPriceEqual = true.
NEW!!! DisableFixSL	false	Disable use FixSL. Expert close orders only by TrailingStop, if TrailingStop = true;	If you use this option, Expert close loss order only by hard Stoploss.
NEW!!! MaxAttemptsForCloseOrder	5	The maximum number of attempts to close an order.	If EA can't close order from first attempt (because have requotes or other error) you can use this option. Advisor will try to close the order again and again until no attempt will end.
WesternpipsSet4=" <<< RISK MANAGMENT >>> "			
RiskPercent	5	Lot size is used as a % of the deposit	If RiskPercent = 0, EA use the fixed lot size. If RiskPercent = 95, EA will trade by maximum lot size and maximum risk.
Lots	0.01	Uses a fixed lot size, if the parameter RiskPercent = 0.	Please use minimum lot size If you are using EA first for test new broker.
max_Lots	10	The maximum allowable size of the lot.	Some brokers use plugin that limits the size of the lot. If you exceed the lot size (for example 10 lot) automatically

			deteriorating execution of open orders or broker includes a slippage plugin.
LotsCountSet="Lots Count: 0-Balance; 1-Equity"			
LotsCount	0	Calculation mode of the lot	If the value LotsCount = 0, Lot calculates from the deposit amount. If the value LotsCount = 1, Lot calculates from the equity amount.
LotsSignalPower	false	Mode allows you to increase the size of a lot, depending on the signal.	If Gap was big EA put lot size more.
NEW!!! MaxLossOnDepositInPersent	10	With this setting, you can control the maximum loss on account in % of the deposit at the time of start-up advisor.	If MaxLossOnDepositInPersent = 0 this function disabled. If MaxLossOnDepositInPersent = 10 then Ea will stop trading after loss of 10% of equity
NEW!!! MaxProfitOnDepositInPersent	0	With this setting, you can control the maximum profit on account in % of the deposit at the time of start-up advisor.	If MaxProfitOnDepositInPersent = 0 this function disabled.
MaxLossOnDepositInUsd	0	With this setting, you can control the maximum loss on account in USD.	If MaxLossOnDepositInUsd = 0 this function disabled. If MaxLossOnDepositInUsd = 200 then Ea will stop trading after loss of 200\$
NEW!!! StopTradingIfUnprofitableOrders	false	Advisor to stop trading if the maximum number of unprofitable orders on a trading instrument exceeds the specified value instant by you.	
NEW!!! MaxUnprofitableOrders	3	The maximum number of of unprofitable orders	If MaxUnprofitableOrders = 3 then Ea will stop trading after continuously 3 trades will open in loss
WesternpipsSet5=" <<< CONTROL SLIPPAGE PLUG-IN >>>"			
NEW!!! StopTradingSlippage	false	Advisor to stop trading if the different between Entry Gap and order open slippage will more than FixTP pips.	The innovative setting which will help control the slippage of a plugin by disabling Advisor automatically and inform you that the broker uses a slippage plug-in to your account.
NEW!!! OrderOpenSlippage	0	Slippage for open order	This value is used in all order open functions

NEW!!! OrderCloseSlippage	0	Slippage for close order	This value is used in all order close functions
NEW!!! StopTradingIfMaxSlippage	false	Advisor to stop trading if the maximum slippage when opening or closing the order exceeds the value instant by you in MaxSlippage set.	
NEW!!! MaxSlippage	0	The maximum slippage for open order and close order, if slippage will more EA stop trading automatically	This value is used only when StopTradingIfMaxSlippage = true;
NEW!!! UseDynamicSlippage	false	The use of dynamic coefficient for the calculation of the slippage for open order.	
NEW!!! DynamicSlippageCoefficient	1.2	Dynamic spread coefficient for the calculation of the order open slippage	
WesternpipsSet6=" <<< CONTROL EXECUTION PLUG-IN >>>"			
NEW!!! UseMaxOpenOrderExecutionTime	false	Using the control function at the maximum opening time of the open transaction. If this feature is enabled, EA will automatically stop trading if the execution of the order will bad (more than MaxOpenOrderExecutionTime in ms).	The innovative setting which will help control the execution of a plugin by disabling Advisor automatically and inform you that the broker uses an execution plug-in to your account.
NEW!!! MaxOpenOrderExecutionTime	1000	The maximum execution time of open order in milliseconds, when EA stop trading	
NEW!!! UseMaxCloseOrderExecutionTime	false	Using the control function at the maximum closing time of the close order.	If this feature is enabled, EA will automatically stop trading if the execution of the order bad (more than MaxCloseOrderExecutionTime in ms).
NEW!!! MaxCloseOrderExecutionTime	1000	The maximum execution time of close	

		order in milliseconds, when EA stop trading	
WesternpipsSet7=" <<< SPREAD CONTROL TOOLS >>>"			
NEW!!! MinSpreadOpenUse	false	Using the prohibition to open order if the spread is less than the MinSpreadOpen value	
NEW!!! MinSpreadOpen	1	Minimum values of the spread at the opening of the transaction	
NEW!!! MaxSpreadOpenUse	false	Using the prohibition to open order if the spread is more than the MaxSpreadOpen value	
NEW!!! MaxSpreadOpen	50	Maximum values of the spread at the opening of the transaction	
NEW!!! MinSpreadCloseUse	false	Using the prohibition to close order if the spread is less than the MinSpreadClose value	
NEW!!! MinSpreadClose	1	Minimum values of the spread at the closing of the transaction	
NEW!!! MaxSpreadCloseUse	false	Using the prohibition to close order if the spread is more than the MaxSpreadClose value	
NEW!!! MaxSpreadClose	50	Maximum values of the spread at the closing of the transaction	
WesternpipsSet8=" <<< COMMISSION SETTINGS >>>"			
OrderCommissionCheck	false	Automatic calculation of order commission. Use in the case when your broker has a commission.	If your broker use commission for the order, use option OrderCommissionCheck = true. To check the commission EA opens only one order with minimum lot size. Do not be alarmed. This will happen only 1 time.
NEW!!! ManualComission	false	You can set the size of the commission for the transaction manually, then the adviser will consider this value when opening and closing orders.	

NEW!!! ComissionInPips	1	Manual set of Commission for the order	Use only if in ManualComission = true;
WesternpipsSet9= "<<< TRAILING STOP SETTINGS >>>"			
NEW!!! UseTrailingStop	false	Enable or disable Trailing Stop	
NEW!!! TrailingStop	1	Trailing Stop size in pips	
NEW!!! TrailingStep	1	TrailingStep size in pips	
NEW!!! UseVirtualTrailingStop	true	Enable or disable Virtual Trailing Stop (hidden from broker)	
NEW!!! VirtualTrailingStop	2	Virtual Trailing Stop size in pips	
NEW!!! VirtualTrailingStep	2	Virtual Trailing Step size in pips	
WesternpipsSet10= "<<< ADDITIONAL SETTINGS >>>"			
UseOldTicksTime	false	If true EA checking time of the last tick from the fast data feed provider and stop trading if this time in seconds more than OldTicksTimeSecStop setting	
OldTicksTimeSec	180	If time of the last tick from the fast data feed provider will more than OldTicksTimeSec EA will show message " Old ticks, Wait new tick from....."	
OldTicksTimeSecStop	600	If time of the last tick from the fast data feed provider will more than OldTicksTimeSecStop EA will stop trading because fast feed provider disconnected.	
ShowGraf	true	Enable or disable the display of all graphical objects on the screen. If you turn off the graphics reduces the load on the processor.	
ShowPriceLabel	true	Show the price label on the chart	
ShowAsk	true	Show the Ask price on the chart	
NEW LOG!!! ShowLog	true	Show the adviser log in Experts Tab	
SoundSignal	true	Play Sound Signal when EA open and close orders	
NEW!!! UseTerminalSleepInMilliseconds	true	This feature allows you to reduce the speed of reading the code in the EA, on which the speed code reading faster, the more powerful a server you need.	When UseTerminalSleepInMilliseconds = false, code reading speed is increased by 20 times, and is 0 ms.

TerminalSleepInMilliseconds	20	Terminal Sleep Time in milliseconds	
WesternpipsSet11=" <<< TIME OF TRADING SETTINGS >>> "			
TimeSet="0-Mt4ServerTime; 1-LocalPCTime; 2-GMT"			It is now possible to control the trading time
NEW!!! UseTimer	false	hours, use the Advisor Scheduled convenient for you, or to set the start time advisor to the news.	
NEW!!! StartHour	9	Hour when EA start trading	
NEW!!! StartMinutes	00	Minute when EA start trading	
NEW!!! StartSeconds	00	Second when EA start trading	
NEW!!! StopHour	22	Hour when EA stop trading	
NEW!!! StopMinutes	59	Minute when EA stop trading	
NEW!!! StopSeconds	59	Second when EA stop trading	

FEATURES AND SETUP OF ADVISOR NEWEST PRO 3.7 EXCLUSIVE HEDGE

This version of the adviser was invented to increase the duration of transactions, thereby circumventing the prohibition on broker transactions of less than 1-2 minutes. Algorithm locks arbitrage transactions, added parameter TimeHedge (trade duration in seconds), after this time closes opposite orders. You do not lose the spread. Everything else is the same as in the classic version. This version will help you outwit your broker and withdraw earned money on arbitration.

EA Settings	The default value	Description	Note
TimeHedge	120	Time hedging transactions in seconds	When you open a transaction adviser to wait or stop profit and hedge deal. After the expiration of the lock closes TimeHedge adviser. In this version, not the values of StopLoss and TakeProfit.

FEATURES AND SETUP OF ADVISOR NEWEST PRO 3.7 EXCLUSIVE HIDDEN

This is a unique Algorithm Hidden Arbitration. Now the broker does not suspect that you are making arbitrage transactions. Transactions are protracted indefinitely, and is not used locking. Transactions camouflage each other and is a revolutionary approach to arbitrage trading. Added the new variables adviser TimeHedge and HedgePoint, which allow you to control the length of transactions and the minimum number of points, after which the transaction will be closed.

EA Settings	The default value	Description	Note
TimeHedge	120	Time hedging transactions in seconds	When you open a transaction adviser to wait or stop profit and hedge deal. After the expiration of the lock closes TimeHedge adviser. In this version, not the values of StopLoss and TakeProfit.
HedgePoint	1	The number of points on which the transaction is hedged.	When you open a transaction adviser to wait or stop profit and hedge deal. After a time TimeHedge Advisor calculates the amount of points stop and profit transactions hedge. While this value does not exceed the value HedgePoint, Advisor closes hedge. Used under a limited broker on the minimum number of points to close the deal. If the broker prohibits transactions of less than 10 points, set HedgePoint = 10.

FEATURES AND SETUP OF ADVISOR NEWEST PRO 3.7 EXCLUSIVE NEWS

New! Be ahead of the news feed. Use Arbitration to maximize profits on the news boom specifically at the request of our customers, we have developed a unique algorithm adviser for trading on the news. As is known, the output of important news, a strong volatility and jumps in quotes. This is the most profitable place for arbitration. Therefore, we modified the classical adviser so that on the big jumps quotes could catch a profit of 30-50 points. Added partial closing of positions in several stages and rollover to breakeven.

FEATURES AND SETUP OF ADVISOR NEWEST PRO 3.7 EXCLUSIVE CFD

Trading CFDs with EA Newest PRO is convenient and simple and a great way to diversify your trading portfolio. Stock CFDs (Contracts for Difference) have become increasingly popular over recent years. Stock index CFDs are financial instruments that represent the value of the underlying publicly-traded companies. One leading index is the S&P 500, which reflects the collective value of top companies trading on the NYSE. If the overall value of those companies' shares rises, the price of the S&P 500 will go up. There are also indices that represent smaller companies trading on the NYSE, as well as indices for various stock exchanges around the world, from Japan's NIKKEI to Germany's DAX. All variety of CFDs is now available for Arbitrage Trading. CFDs on Stock indices, CFDs on individual equities, CFDs on commodities and CFDs on metals - All of these instruments, you can try trading with the new version of the advisor Newest PRO.

Ea Settings	The default value	Description	Note

UseCFDShift	false	Use alignment quotes	
CFDShift	0.01	Align quotes using this option.	For example: Bid in Saxo Bank = 312.54 Bid in mt4 = 3.1254 To align SaxoBid = 312.54 * CFDShift;

ABOUT FOREX ARBITRAGE TECHNOLOGY

If you are not a beginner in Forex, then you probably noticed more than once, as the price of the same financial instrument on a single broker differs from another broker. And later equalized prices. This is particularly noticeable at the jump of volatility, important news, and sometimes in a quiet market. Why is that you ask? Everything depends on the liquidity provider. Each broker has his own Liquidity Provider. That's why there are gaps (hovering) quotations. Another reason is the imperfect transmission algorithm quotations in MT4 (MT5). Brokers are interacting with the liquidity provider using Bridge, which is significantly delayed transfer of data (quotes). Of course you will not notice this lag on the eye, it is too small, and especially do not have time to enter the trade. Therefore, only the high Newest robot able to make a profit. Included with the program advisor Newest Goes Trade Monitor, which receives quotations from more rapid liquidity provider (Saxo Bank, CQG, RITHMIC and LMAX) and transmits them to MT4 (MT5) is much faster than updated quotes in the MT4 (MT5). Newest Advisor compares the results and trades in the direction of the backlog (hovering) quotations.

An arbitrage opportunity (Arbitrage Forex) is 100% profitable position that allows you to install a large lot size and a small stop loss. So do not be surprised when our video reports see 100-300% profit in 2-3 days and a huge risk to the transaction. But not as easy as it seems. Broker is not like how high-frequency experts works, and in most cases, the broker pays the profit out of your pocket, so it prevents all the ways this kind of trade.

The main problem faced by the trading system Newest - a search for a broker. To date, the Forex market open more new dealing centers, and it opens the way to new profits. We think that our advisor Newest will be profitable for many years to come and, as long as there is a Forex, until there are new brokers, until there are slow and fast data transfer protocol. We in turn will adapt to the new terms of trade and improve our trading robot Newest PRO. Constant search optimization - that's the key to success in arbitrage trading. Bought our advisor Newest, do not expect immediate profits. It's a complex trading system, it requires hard work. Before using our advisor on real accounts, try it on a demo. Carefully read the instructions and all the settings. And when you fully understand how it works, then use it only on real accounts. The manual will describe the main points needed for profitable trading advisor Newest. Most importantly - it's a constant search and brute force brokers. This mission rests solely on you. We will suggest some suitable brokers, but In the future the customer will be looking for new. This is a basic condition on which we sell our software package Newest. We guarantee the correct and proper advisor work and software for it. We have developed an algorithm that allows you to become a high- frequency trader, use lag (hovering) quotations and reap the benefits. You pay for the software. Everything else is in your hands. It remains for us to wish you a successful trading!

WARNING! FIRST WEEK PLEASE TEST AND VERIFY ALL Ea ON A DEMO ACCOUNT! READ AND UNDERSTAND SETTINGS AND OPERATING LOGIN ADVISORS Carefully. Pick the correct settings. And if you know what to do, THEN PROCEED TO REAL TRADE!

To ensure the best performance of your computer or VPS displace open terminals and programs on the taskbar. Do not allow the CPU usage over 95%. OR Rent a powerful VPS for trading arbitrage.

CONTACT US
